Performance Evaluation 30 (1997) 267

PERFORMANCE EVALUATION
An International Journal

Author Index Volume 30

(The issue number is given in front of the page numbers)

Balbo, G. and **G. Serazzi,** Asymptotic analysis of multiclass closed queueing networks: Multiple bottlenecks (3) 115–152
Boyer, J., *see* Gravey, A. (1–2) 19–43

Choudhury, G.L. and **W. Whitt,** Long-tail buffer-content distributions in broadband networks (3) 177–190

Daduna, H., Some results for steady-state and sojourn time distributions in open and closed linear networks of Bernoulli servers with state-dependent service and arrival rates (1–2) 3–18
Ding, Q.-L., *see* Lee, T.T. (4) 243–264

Fang, S.-C., *see* Mishra, S. (4) 217–241

Gravey, A., J. Boyer, K. Sevilla and **J. Mignault,** Resource allocation for worst case traffic in ATM networks (1–2) 19–43

Krishnan, K.R. and **G. Meempat,** Long-range dependence in VBR video streams and ATM traffic engineering (1–2) 45–56
Kulkarni, V.G., *see* Puryear, L.C. (4) 195–215

Le Boudec, J.-Y., *see* Robert, S. (1–2) 57–68
Lee, J.Y., *see* Lee, K.S. (3) 153–175
Lee, K.S., C.K. Un and **J.Y. Lee,** Performance analysis of input queue with combination of push-out and state-dependent scheduling schemes for nonblocking ATM switches (3) 153–175
Lee, T.T., S.C. Liew and **Q.-L. Ding,** Parallel communications for ATM network control and management (4) 243–264
Liew, S.C., *see* Lee, T.T. (4) 243–264

Meempat, G., *see* Krishnan, K.R. (1–2) 45–56
Mignault, J., *see* Gravey, A. (1–2) 19–43
Mishra, S. and **S.-C. Fang,** A maximum entropy optimization approach to tandem queues with generalized blocking (4) 217–241

Puryear, L.C. and **V.G. Kulkarni,** Comparison of stability and queueing times for reader–writer queues (4) 195–215

Robert, S. and **J.-Y. Le Boudec,** New models for pseudo self-similar traffic (1–2) 57–68
Rose, O., Simple and efficient models for variable bit rate MPEG video traffic (1–2) 69–85

Serazzi, G., *see* Balbo, G. (3) 115–152
Sevilla, K., *see* Gravey, A. (1–2) 19–43
Strelen, J.C., Approximate product form solutions for Markov chains (1–2) 87–110

Un, C.K., *see* Lee, K.S. (3) 153–175

Whitt, W., *see* Choudhury, G.L. (3) 177–190

Performance Evaluation 30 (1997) 269

PERFORMANCE EVALUATION
An International Journal

Subject Index to Volume 30

Admission control 3
Aggregation 87
Aggregation/disaggregation algorithms 87
Approximate solution of discrete time and continuous time Markov chains 87
Arrival theorem 3
Asymptotic analysis 115
Asynchronous transfer mode 45, 153, 177, 243
ATM 45, 153, 177, 243
ATM networks 69
ATM switch 153
ATM transfer capabilities 19

B-ISDN 177
Bottleneck migration 115
Broadband networks 177
Buffer content 177
Burst level model 19

Courtois's theory of decomposability 57
Cyclic queues 3

Diversity routing 243

Effective bandwidth 45
End-to-end-delay 3

FCFS Bernoulli servers 3
Fitting 57
Fluid model 19

General blocking 217

Hurst parameter 57

Joint distribution of sojourn times 3

Kanban blocking 217

LAN traffic 57
Long-range dependence 45
Long-tail distributions 177
Loss networks 3

M/G/1 queue 195
M/G/∞ queue 195
Markov chains 69
Markov model 57
Mean queue length distribution 217
Modeling 115
MPEG video traffic 69
Multiclass queueing networks 115
Multiplexing 45

Network control and management 243
Nonlinear programming 217

Open tandem network 3
Open tandem queue 217

Parallel communications 243
Performance 115
Power tails 177
Principle of maximum entropy 217
Priority control 153
Product form 87
Product form distribution 3
Product form networks 115
Push-out scheme 153

Quality of service 243
Queueing networks 217

Reader–writer queue 195
Regularly variation 177
Replicated database 195
Resource allocation 19

Scheduling scheme 153
Self-similar processes 57
Semi-Markov process 153
Shared memory 195
Statistical multiplexing 19
Stochastic fluid models 177
Subexponential distributions 177

Tail probabilities 177
Traffic models 69

VBR traffic 45

Worst case traffic 19
